

ELE International Introduction

The Company	4 - 5
Innovators	6
Assurance	7
Leading-edge Innovations	8 - 9
Global Distribution	10 - 11
Service	12

Soil Testing

Soil Testing Introduction	13
In-situ Sampling & Preparation	14 - 20
Moisture Content	21
Soil Index Properties	22 - 26
Particle Size Distribution & Sand Equivalent Value	27 - 28
Compaction & CBR	29 - 44
Consolidation	45 - 48
Permeability	49 - 52
Soil Strength (Triaxial)	53 - 67
Direct Shear & Vane Tests	68 - 71
Data Logging, Software & Electronic Instrumentation	72 - 77
In-situ Testing	78 - 79
In-situ Density	80 - 82

Soil Testing Buyer's Guide

Tests, Standards & Equipment	83 - 114
------------------------------	----------

Concrete Testing

Concrete Testing Introduction	115
Fresh & Hardened Concrete Testing	116 - 131
Non-Destructive Testing of Hardened Concrete	132 - 137
Compression Machines	138 - 155
Flexural, Transverse Machines & Accessories	156 - 158

Concrete Testing Buyer's Guide

Tests, Standards & Equipment	159 - 165
------------------------------	-----------

Cement Testing

Cement Testing Introduction	167
Chemical Tests	168 - 170
Fineness	171 - 172
Consistency, Setting Time, Workability & Flow	173 - 177
Soundness	178 - 180
Air Content & Density	181
Fly Ash	182 - 183
Mixing, Moulding, Curing & Strength	184 - 191

Cement Testing Buyer's Guide

Tests, Standards & Equipment	193 - 197
------------------------------	-----------

Aggregates Testing

Aggregates Testing Introduction	199
Sampling & Preparation of Aggregates	200
Determination of Flakiness & Elongation	201 - 202
Density, Voids & Bulking	203 - 204
Soundness & Chemical Tests	205 - 207
Mechanical Properties	208 - 212

Aggregates Testing Buyer's Guide

Tests, Standards & Equipment	213 - 219
------------------------------	-----------

Asphalt Testing

Asphalt Testing Introduction	221
Analysis & Binder Recovery	222 - 224
Bitumen & Tar	225 - 227
Design & Testing of Bituminous Mixtures	228 - 235
Specific Gravity	236 - 237
Bitumen & Tar	238 - 240
Gyratory Compaction	241 - 242
Pavement	243 - 246
Temperature & Density	247 - 250

Asphalt Testing Buyer's Guide

Tests, Standards & Equipment	251 - 256
------------------------------	-----------

Rock Mechanics Testing

Rock Mechanics Testing Introduction	257
Triaxial & Permeability Strength	258 - 261
	262

Rock Mechanics Testing Buyer's Guide

Tests, Standards & Equipment	263
------------------------------	-----

Laboratory Testing

Laboratory Testing Introduction	265
Load Measurement	266 - 268
Drying & Weighing	269 - 270
Particle Size Analysis	271 - 276
Sieve Shakers	277
Laboratory Hardware	278 - 279
Glass & Plastic Ware	280 - 281
Temperature Measurement	282
Digital Thermometers	283
General	284 - 287

Environmental Testing

Environmental Testing Introduction	288 - 289
Physical Survey	290 - 293
Soils	294 - 311
Water	312 - 324
Meteorology	325 - 336
Crop Science	337 - 343
Harvesting & Storage	344 - 346
Environmental Laboratory Equipment	347 - 352

Indexes/Terms & Conditions

Alphabetical Product Index	353 - 363
Tests with Standards Index	365 - 368
Terms & Conditions of Sale	370 - 371

ELE International

The Company

ELE International Centre of Excellence, Bedfordshire, United Kingdom

ELE International specialise in the design, manufacture and supply of high quality construction materials testing equipment and environmental instrumentation. Our products are backed by global customer service, with comprehensive technical and applications support.

ELE International was founded in 1961 with a mission to serve the materials testing needs of the Construction Materials Industry. The Environmental Division, specialising in international projects, was created in 1983.

ELE is considered one of the pioneers within the Materials Testing Industry both in the UK and internationally. The business has seen steady growth over the years and the portfolio has increased from single digits to hundreds of new and innovative testing products. The company now has a major global presence with a highly talented and diverse workforce.

Product sales, manufacturing, service and customer support are available from strategically located offices in the UK and USA, together with dedicated sales offices in the Middle East and Asia, and more than 40 channel partners around the globe supporting the ELE brand in region. The UK head office is located in Leighton Buzzard, Bedfordshire, and is a centre of excellence for ELE's new product developments.

ELE International is part of the multi-national Danaher Corporation. Danaher acquired ELE in 2001 with the aim to further strengthen the business by investing in research and development. The ELE business now enjoys all the benefits associated with being part of a Fortune 150 company.

Mission Statement

To develop new materials testing technologies that ensure the safety of civil infrastructure systems globally, technologies that improve the quality of our buildings, roads, bridges, and homes.

Vision Statement

For ELE International to be identified as a benchmark for quality, innovation and customer support. To empower its employees and associates to develop and grow with the business to reach their full potential.

DANAHER

Danaher is a Fortune 150 ranked company renowned for acquiring and building strong growth businesses worldwide. 90% of its revenue comes from scientific and technological companies. Danaher employs 59,000 people worldwide.

In its early days, Danaher consisted of a group of discrete, manufacturing businesses. In the mid-1990s this fragmented structure was transformed into one built around strategic platforms, each with sustainable competitive advantages in sizeable global markets. Over the next decade the company established leadership in the markets that define it today, beginning with water in 1998 and followed by product identification (2001), dental (2004), diagnostics (2006) and life sciences (2009).

Today Danaher is a global science and technology innovator committed to helping customers solve complex challenges and improving quality of life around the world. Our trusted brands hold unparalleled leadership positions in diagnostics, life sciences, dental care and environmental and applied solutions.

Through strategic acquisitions, Danaher Corporation has formed a diverse portfolio of water quality optimization companies that, as a united platform, can significantly impact the way its customers approach water. The company portfolio includes Hach, Trojan Technologies, McCrometer, ChemTreat and OTT Hydromet. ELE International is a proud member of Danaher's Water Quality Group (WQG) as a division of Hach Lange Ltd.

ELE International

Innovators

Advanced Engineering

The Engineering team is split into three disciplines; mechanical, electronic and software. These teams work together to introduce new products, maintain existing products and support our internal departments requiring engineering input and assistance.

Following significant capital investment, our engineering team run the latest 3D CAD and FEA simulation software to verify our designs and ensure our equipment is safe, robust and meets international standards.

These investments help us to introduce new products in a fast and efficient manner utilizing the latest production methods such as multi axis CNC and laser cutting equipment, along with 3D printing technology for rapid prototyping.

The Engineering Design team can assist with laboratory layouts, helping plan the position of machines and advising on their service requirements such as water, power and drainage, and also producing fly-through videos and detailed floor plans.

Quality Control

It is the policy of ELE International to provide its customers with good quality products, service and workmanship that fully meets their expectations by maintaining continual development of quality and laboratory management systems. It is the intention for products to be safe, reliable, fully fit for purpose and compliant to statutory health and safety regulations. ELE International has a quality management system certified to the requirements of BS EN ISO 9001 covering all aspects of the business, from concept design, manufacturing, assembly, test and inspection, to warehousing and after-sales support, with UKAS accreditation for repair and calibration. Our system is subject to regular surveillance by an internationally recognised third-party certification body. All processes are defined and documented to meet the requirements of our customers.

In addition to this ELE International has a laboratory management system certified to ISO/IEC 17025 for the calibration and testing of force measurement systems, enabling us to carry out on-site service and calibration of compression testing machines and associated equipment. The organisation is committed to the use of good professional practice in providing a high standard of calibration and service.

Our quality control procedures, backed by the proven reliability of our test equipment and the experience of our team, ensure we can repeatedly supply the highest quality products to give a long and trouble free operating life with minimal maintenance costs.

ELE International

Leading-edge Innovations

SoilTest **PRO** Range

AUTO Soils Consolidator (ASC)

The ASC is fully automatic and runs a full consolidation test without user intervention, which saves valuable time. A built-in electronic stepper motor ensures precise control of loading over the entire 15 kN range. This design improves the accuracy of loading and avoids the need for a compressor.

- Fully Automatic – reduces testing time.
- No compressor – stepper motor improves accuracy across entire 15 kN load range.
- Variable speed to suit sample type.
- Multi language.
- 7" waterproof, colour, graphical touchscreen.
- Ability to include manual Consolidation Frames.
- Can change target loads during a test.
- Flexible reports.
- Save configurations for easy set-up of multiple cells and repeat tests.
- Compatible with latest DS8 software.
- Wide range of sample cells.

DS 8.0 ATM Software

For Systematic Testing

The AUTO Soils Consolidator has been launched alongside the latest version of ELE's DataSystem soil test management software, DS8.0 which is loaded with the current BS, ASTM and AASHTO standards, and is compliant with windows 10.

- Automatic Test Management Software
- Cost effective
- User friendly
- Reduces test time
- Ethernet connectivity
- Manage up to 16 machines simultaneously
- Remote service diagnostics
- Advanced customisable reporting

ADR Touch Control PRO

Accurate & Consistent Testing

The ADR Touch Control Pro will deliver all the features and quality of the established ADR-Auto range, with its 20 year history, but with a new sleek design and additional capabilities. The console assembly consists of an ADR Touch Control Pro and power base which can be used with all existing concrete and cement frames.

- ▶ Larger 7-inch, high resolution, colour display.
- ▶ Favourites option for test samples.
- ▶ Flexible head: 75-degree rotation and 45-degree tilt.
- ▶ Available in English, Spanish, Portuguese and French options.
- ▶ Remote operation away from test area via App.
- ▶ Remote diagnostics.
- ▶ Dual sensor for testing both concrete and cement samples on one frame.
- ▶ Upgrade kits available for compatibility with existing lower consoles.
- ▶ Over 100 pre-programmed test profiles and large memory storage capacity available.

AUTO Soil Compactors

BS/EN & ASTM Models

The time and effort required to prepare specimens for compaction studies and other test methods can often be costly and time-consuming. The use of an automatic, mechanical compactor will show considerable cost benefits over hand compaction methods. Two models meeting the requirements of BS/EN and ASTM are available.

- ▶ NEW CE compliant guarding as an extra safety measure for users.
- ▶ Complies to BS 1377-4, BS 1924-2, EN 13286-2, EN 13286-47, ASTM D558, ASTM D698, ASTM D1557, AASHTO T99, AASHTO T134, AASHTO T180 standards.
- ▶ Pre-set blow pattern ensures even compaction.
- ▶ Solid state controls for reliability and ease of maintenance.
- ▶ Automatic re-setting of counter after completion of blow pattern.

ELE International

Global Distribution

Our network of distributors and service providers gives us a global reach and allows us to react quickly and efficiently to the needs of our customers, whatever they may be. From quotation to installation, calibration to training, ELE will strive to give the best possible service to the standard they would expect.

We have distributors based in the following countries:

Argentina	Ecuador	Kenya	Singapore
Australia	Egypt	Kuwait	South Korea
Bangladesh	El Salvador	Lebanon	Sri Lanka
Bolivia	Ghana	Libya	Thailand
Brazil	Guatemala	Malaysia	Trinidad & Tobago
Canada	Honduras	Mexico	Turkey
China	Hong Kong	Nicaragua	U.A.E.
Colombia	Indonesia	Oman	United Kingdom
Costa Rica	Iraq	Pakistan	USA
Dominican Republic	Israel	Peru	Vietnam
	Jordan	Saudi Arabia	

ELE International Service

Exceptional Customer Support

At ELE we are committed to providing the best possible support and after-sales care to our customers. ELE has been in business for more than 50 years and has a worldwide reputation for quality. This not only covers the wide range of testing and laboratory equipment that we supply, but also the standard of service and technical support that we offer.

In the modern market place, and with the diversity of our end users, we understand that each customer has different requirements, which is why we pride ourselves on being able to react quickly and efficiently to any situation. Our UK and USA based teams of trained service engineers are dedicated to responding to customer enquiries and we aim to provide complete solutions, whatever the nature of the enquiry. Purchasing equipment is just the start of our journey together; we offer a comprehensive training program for operators and engineers alike, with courses based in our UK and USA offices and at customers' sites.

Our skilled Engineers will ensure that any issues arising are dealt with in a timely and professional manner.

Calibration is an essential part of ensuring the accuracy of our test equipment. We proudly hold the accreditation certificate from UKAS, the United Kingdom Accreditation Service, who ensure that our equipment and procedures are fully traceable to the relevant standards. Our highly trained, UK based service engineers are all accredited by the UKAS body, so you can rest assured that the calibration of your equipment is carried out to the highest possible standard.

When you buy ELE, you are not just getting high quality equipment from one of the leading companies in the market, you are also buying the comfort of knowing that we are here to support you every step of the way.
